

## DAFTAR ISI

|                                                                           |      |
|---------------------------------------------------------------------------|------|
| ABSTRAK.....                                                              | i    |
| ABSTRACT.....                                                             | ii   |
| KATA PENGANTAR.....                                                       | iii  |
| DAFTAR ISI.....                                                           | iv   |
| DAFTAR GAMBAR .....                                                       | ix   |
| DAFTAR TABEL .....                                                        | xiii |
| DAFTAR SIMBOL.....                                                        | xiv  |
| DAFTAR LAMPIRAN.....                                                      | xv   |
| BAB 1 PENDAHULUAN .....                                                   | 1    |
| 1.1. Latar Belakang .....                                                 | 1    |
| 1.2. Rumusan Masalah.....                                                 | 3    |
| 1.3. Maksud Penelitian.....                                               | 3    |
| 1.4. Tujuan Penelitian .....                                              | 3    |
| 1.5. Batasan Masalah .....                                                | 3    |
| 1.6. Metodologi Penelitian .....                                          | 4    |
| 1.6.1. Rumusan Masalah.....                                               | 5    |
| 1.6.2. Studi Literatur .....                                              | 5    |
| 1.6.3. Analisis Metode .....                                              | 5    |
| 1.6.4. Pengembangan Model Klasifikasi Pergerakan Arah Mata (IndRNN) ..... | 5    |
| 1.6.5. Pengujian Metode .....                                             | 6    |
| 1.6.6. Kesimpulan .....                                                   | 6    |
| 1.7. Sistematika Penulisan .....                                          | 6    |
| BAB 2 LANDASAN TEORI.....                                                 | 8    |
| 2.1. Pergerakan Mata .....                                                | 8    |
| 2.2. Pengolahan Citra Digital.....                                        | 9    |

|          |                                                       |    |
|----------|-------------------------------------------------------|----|
| 2.2.1.   | Dasar-Dasar Pengolahan Citra .....                    | 10 |
| 2.2.2.   | Model Citra Digital .....                             | 11 |
| 2.2.3.   | Model Warna RGB.....                                  | 12 |
| 2.2.4.   | Pengenalan Pola ( Pattern Recognition ).....          | 14 |
| 2.2.5.   | Penskalaan Citra ( Scaling ).....                     | 15 |
| 2.2.5.1. | Interpolasi Bilinear.....                             | 15 |
| 2.2.6.   | Konversi Warna <i>Grayscale</i> .....                 | 16 |
| 2.3.     | Normalisasi Min-Max.....                              | 17 |
| 2.4.     | Computer Vision .....                                 | 17 |
| 2.4.1.   | Elemen-Elemen Computer Vision.....                    | 18 |
| 2.5.     | Augmentasi .....                                      | 19 |
| 2.6.     | Jaringan Syaraf Tiruan ( <i>Neural Network</i> )..... | 21 |
| 2.7.     | Convolutional Neural Network (CNN).....               | 22 |
| 2.7.1.   | Konsep CNN .....                                      | 22 |
| 2.7.2.   | Arsitektur CNN .....                                  | 24 |
| 2.7.3.   | Convolution Layer .....                               | 25 |
| 2.7.3.1. | Rectified Linear Unit (ReLU) .....                    | 26 |
| 2.7.4.   | Pooling Layer.....                                    | 26 |
| 2.7.5.   | Flatten Layer .....                                   | 27 |
| 2.8.     | RNN .....                                             | 27 |
| 2.9.     | Independently Recurrent Neural Network (IndRNN).....  | 29 |
| 2.9.1.   | Data Input 3D.....                                    | 31 |
| 2.9.2.   | Normalisasi <i>Batch</i> .....                        | 31 |
| 2.9.3.   | Dropout .....                                         | 31 |
| 2.9.4.   | Lapisan Output.....                                   | 32 |
| 2.5.3.1. | Fungsi Aktivasi Softmax .....                         | 32 |
| 2.5.3.2. | Optimasi Adam .....                                   | 32 |

|                                     |                                           |    |
|-------------------------------------|-------------------------------------------|----|
| 1.5.3.3.                            | Stochastic Gradient Descent (SGD).....    | 33 |
| 2.10.                               | K-Fold Cross Validation.....              | 33 |
| 2.11.                               | Evaluasi dan Pengukuran Kinerja.....      | 34 |
| 2.11.1.                             | Akurasi.....                              | 34 |
| 2.11.2.                             | Confussion Matrix.....                    | 35 |
| 2.11.3.                             | Loss.....                                 | 35 |
| 1.6.3.1.                            | Cross-Entropy Loss.....                   | 35 |
| 2.11.4.                             | Classification Report.....                | 36 |
| 2.12.                               | Penelitian Terkait.....                   | 38 |
| BAB 3 ANALISIS DAN PERANCANGAN..... |                                           | 41 |
| 3.1.                                | Gambaran Umum Sistem.....                 | 41 |
| 3.2.                                | Pengumpulan Dataset.....                  | 43 |
| 3.3.                                | Preprocessing Image.....                  | 43 |
| 3.3.1.                              | Tahap Penskalaan ( <i>Scaling</i> ).....  | 44 |
| 3.3.2.                              | Tahap Grayscale.....                      | 45 |
| 3.4.                                | Augmentasi.....                           | 46 |
| 3.4.1.                              | Definisi Augmentor.....                   | 46 |
| 3.4.2.                              | Menghitung Jumlah Augmentasi.....         | 48 |
| 3.4.3.                              | Proses Augmentasi.....                    | 48 |
| 3.5.                                | Ekstraksi Fitur Mata Menggunakan CNN..... | 49 |
| 3.5.1.                              | Arsitektur CNN.....                       | 50 |
| 3.5.2.                              | Persiapan Data Input Ekstraksi.....       | 50 |
| 3.5.2.1.                            | Labels Mapping.....                       | 51 |
| 3.5.2.2.                            | Split Dataset.....                        | 53 |
| 3.5.2.3.                            | Normalisasi Min-Max.....                  | 55 |
| 3.5.2.4.                            | Penambahan Dimensi Kanal.....             | 57 |
| 3.5.2.5.                            | Penyimpanan Data Persiapan.....           | 58 |

|          |                                                                  |    |
|----------|------------------------------------------------------------------|----|
| 3.5.3.   | Lapsian Konvolusi .....                                          | 59 |
| 3.5.4.   | Lapisan Pooling.....                                             | 59 |
| 3.5.5.   | Lapisan Batch Normalization.....                                 | 60 |
| 3.5.6.   | Lapisan Dropout.....                                             | 60 |
| 3.5.7.   | Flatten .....                                                    | 62 |
| 3.6.     | Klasifikasi Arah Pandangan Menggunakan <i>IndRNN</i> .....       | 62 |
| 3.6.1.   | Training IndRNN .....                                            | 63 |
| 3.6.2.   | Persiapan Data Input Model.....                                  | 65 |
| 3.6.2.1. | K-Fold Cross Validation.....                                     | 65 |
| 3.6.3.   | Arsitektur IndRNN.....                                           | 66 |
| 3.6.4.   | Membuat Lapisan RNN Dengan IndRNN .....                          | 68 |
| 3.6.5.   | Normalisasi <i>Batch</i> .....                                   | 69 |
| 3.6.6.   | Dropout .....                                                    | 70 |
| 3.6.7.   | Lapisan Output.....                                              | 70 |
| 3.6.8.   | Kompilasi model.....                                             | 71 |
| 3.6.9.   | Pelatihan Model .....                                            | 72 |
| 3.7.     | Evaluasi Kinerja Sistem .....                                    | 73 |
| 3.7.1.   | Hasil Model Training Akurasi IndRNN .....                        | 73 |
| 3.7.2.   | Confusion Matrix .....                                           | 74 |
| 3.7.3.   | Hasil Model Training Loss IndRNN .....                           | 75 |
| BAB 4    | IMPLEMENTASI DAN PENGUJIAN .....                                 | 78 |
| 4.1.     | Implementasi Teknis .....                                        | 78 |
| 4.2.     | Implementasi Arsitektur Convolutional Neural Network (CNN) ..... | 78 |
| 4.2.1.   | Inisialisasi Model CNN.....                                      | 79 |
| 4.2.2.   | Definisi Arsitektur.....                                         | 79 |
| 3.6.2.2. | Lapisan Konvolusi Pertama .....                                  | 79 |
| 3.6.2.3. | Lapisan Max Pooling .....                                        | 80 |

|          |                                                  |    |
|----------|--------------------------------------------------|----|
| 3.6.2.4. | Lapisan Batch Normalization.....                 | 80 |
| 3.6.2.5. | Lapisan Dropout.....                             | 80 |
| 3.6.2.6. | Lapisan Konvolusi Kedua.....                     | 81 |
| 3.6.2.7. | Lapisan Konvolusi Ketiga.....                    | 81 |
| 3.6.2.8. | Lapisan Flatten.....                             | 82 |
| 4.2.3.   | Kompilasi Model.....                             | 82 |
| 4.2.4.   | Ekstraksi Fitur.....                             | 82 |
| 4.2.5.   | Penyimpanan Fitur yang Diekstraksi.....          | 83 |
| 4.3.     | Implementasi Model IndRNN.....                   | 83 |
| 4.3.1.   | Inisialisasi Model IndRNN .....                  | 83 |
| 4.3.2.   | Definisi Arsitektur IndRNN .....                 | 84 |
| 4.3.2.1. | IndRNN Cell .....                                | 84 |
| 4.3.2.2. | Lapisan RNN.....                                 | 84 |
| 4.3.2.3. | Lapisan Batch Normalization.....                 | 84 |
| 4.3.2.4. | Lapisan Dropout.....                             | 85 |
| 4.3.2.5. | Lapisan Dense .....                              | 85 |
| 4.3.3.   | K-Fold Cross-Validation .....                    | 85 |
| 4.3.4.   | Kompilasi Model.....                             | 86 |
| 4.3.5.   | Pelatihan Model .....                            | 86 |
| 4.3.5.1. | Model Checkpoint.....                            | 87 |
| 4.3.6.   | Evaluasi Model .....                             | 87 |
| 4.3.7.   | Visualisasi Hasil.....                           | 87 |
| 4.4.     | Skenario Pengujian Terhadap Model IndRNN.....    | 88 |
| 4.5.     | Skenario Pengujian Jumlah Unit Pada IndRNN ..... | 88 |
| 4.6.     | Skenario Pengujian Dropout Rate.....             | 89 |
| 4.7.     | Skenario Pengujian Batch Size .....              | 90 |
| 4.8.     | Skenario Pengujian Learning Rate.....            | 91 |

|                                  |                                               |     |
|----------------------------------|-----------------------------------------------|-----|
| 4.9.                             | Skenario Pengujian Epoch .....                | 91  |
| 4.10.                            | Hasil Pengujian Model IndRNN .....            | 92  |
| 4.10.1.                          | Hasil Pengujian Jumlah Unit Pada IndRNN ..... | 92  |
| 4.10.2.                          | Hasil Pengujian Dropout Rate.....             | 96  |
