Chapter 5

Conclusions and suggestions

1.1. Conclusion

The conclusion of this research titled "online movie booking system" is as follows;

1. The web-based application can help customer to book ticket for movie from any device which is connected to internet, the web-based application will make customers to watch trails, movie rating, and book tickets, pay from their debit cards easily.

2. The web-based movie booking system will be a new system in cinemas in Afghanistan, it will help just not Ahmadies cinema but also can be rented to other cinemas to help other cinemas as well.

3. This application will keep the record of customers, customer will always be able to book and check new movie trails

1.2. Suggestion

The Ahmadies Online movie booking system will have more improvements into it in the future. Thus, it is reviewable and can be redeveloped more by contributing innovations to increase its feature and functions to the existing system.

There are some suggestion that can be added on to this application

1. Adding a deposit account for customers to do their payment more easily and secure.

2. To have mobile application for the customer to use form their smart phones and tablets. The mobile application will be ready for download in playstore or app store
