CHAPTER IV

CONCLUSION AND SUGGESTION

This chapter describes the summaries in the activity of the job training. The conclusion and suggestion would be explained generally, as follow:

4.1 Conclusions

After finishing the research, the writer concludes that it is important to understand about types of sign such as symbol/symbolic, icon/iconic and index. In the brochure, the writer did not find about index/indexical, the writer only found symbol and icon because index is like 'natural sign' such as if there is a smoke, there is a fire. The writer found symbols in the brochure such as the picture of houses, birds, tricycle, people, and windows. Then, the writer found symbol in the brochure such as symbol of walls, rows *praktis* and direction to open the door.

4.2 Suggestions

There are some suggestions which the writer has, as follow:

1. **Company**

   The company should give more activities to the student who will take the job training. The company should give a chance to the student to have more experience.

2. **Faculty of Letter**

The faculty should give more introduction/explanation about the job training and also the procedure how to take the job training before the student is placed in an institution.

3. **English Department**

The English Department should be better to have a list of companies where the students can apply for their job training.

4. **Student**

The students have to search the company or institutions which match with their abilities so it will give a chance to improve their ability.
