THE EFFECT EARNING PER SHARE (EPS) AND DEBT TO EQUITY RATIO (DER) OF STOCK PRICE MINING SECTOR IN LISTED INDONESIAN STOCK EXCHANGE (IDX)

ABSTRACT

Needs information about the stock price for investors is increasing, it is because investors want to reduce the losses, so the analysis of internal factors and external sources on stock prices is indispensable. The purpose of this study was to determine the effect of variable Earnings per Shares (EPS), Debt To Equity Ratio (DER), on stock prices.

The population in this study are listed all the mining sector in Indonesia Stock Exchange 2003-2011 period. While the sample is taken as the object of study is 4 (four) mining, using purposive sampling techniques for sampling. This study uses secondary data obtained from BEI for the company's internal data such as earnings per share (EPS), debt to equity ratio (DER), and the stock price period 2003-2011.

The results of the analysis of the influence of earnings per share and debt to equity ratio of stock prices simultaneously significantly affected. On testing the obtained partial results, earnings per share significantly affected the stock price. And debt to equity ratio is not significantly affect the stock price.
