ABSTRACT

WIDIANA PUSPITASARI. The role of Indonesia Japan Economic Partnership Agreement (IJ-EPA) in overcoming the Electrical Crisis in North Sumatra. Program Study international relations, the School Of Social Sciences And Politics, Universitas Komputer Indonesia, Bandung 2009.

The Ekonomic cooperation between Indonesia with Japan was deformed the International awareness of the two countries about the need to hold the cooperation in handling the problem that was dealt with, that is the problem of economic retardation especially Indonesia that and today still is becoming the serious problem. Several sectors of available energy in Indonesia apparently still needed help from overseas like investment, both in the energy field, and the infrastructure (electricity).

The aim of the research of the thesis that the researcher for this was to know, dig and describe the role Indonesian Japan in the growth of Indonesian economics through was formed by him the agreement between the two countries Indonesian Japan in the energy field. Whereas the benefit or the use of this research was theoretical, this research was hoped for could contribute for the treasury and the development of science that was linked with the study field of international relations. Further, practically, this research could it was hoped be useful as the reference for the researcher in studying the growth of economics through the context of the international co-operation. In this case was the role of IJ-EPA in overcoming the electricity crisis in North Sumatra.

The method that was used in carrying out this research was descriptive analytical and the bibliography that aimed at depicting a phenomenon in this case the development from the Role Indonesian Japan Economic Partnership Agreement in overcoming the electricity crisis in North Sumatra that was brought about through Investment in the PLTPB Sarulla Project and systematically was researched in order to overcomes the North Sumatra crisis of electricity supplies.

Results of this research it was hoped with the existence of the bilateral co-operation of IJ-EPA to the front can reduce the good electricity crisis in North Sumatra and Indonesia in umumya. Also the success from the co-operation of the economic partnership in the energy field will become the step in early in overcoming the electricity crisis in North Sumatra.
