ABSTRACTION

PT Kereta Api (Persero) is a national transportaion company. Travelers has compalins on ticket resesration. Especially in queueing problems because each people has their own bussiness. Therefore, every traveller needs an information system thet provides train departure schedule and online ticket reservation. Author create a ticket reservation and train departure information system due to make esasiness to travellers.

Author is using field research methods such as interview and literature resesarch. To develop the system, author is using prototype methods. To realize these program, author using several software such as Xampp as the server, macromedia Dreamweaver as the programming tools, Adobe Firework as interface design tools and Mozilla Firefox as browser.

Hopefully by applying these system can help to ease traveler in transporting using PT Kereta Api services.
