SINGKATAN-SINGKATAN

A

AC = Alternating Current

ASK = Amplitudo Shift Keying

AM = Amplitudo Modulation

B

BASCOM = Basic Compiler

BASIC = Baginners All-purpose Symbolic Instruction Code

C

CE = Chip Enable

CS = Chip Select

CT = Center Trap

D

DC = Direct Current

DCE = Data Circuit-Terminating Equipment

DTE = Data Terminal Equipment

E

EIA = Electronic Industry Association

F

FIFO = First In First Out

FM = Frequency Modulation

FSK = Frequency Shift Keying

G

GFSK = Gaussian Frequency Shift Keying

I

IDE = Integrated Development Environment

ISP = In-System Programmable

ISM = Industrial, Scientific and Medical

M

MDI = Multiple Document Interface

O

OOP = Object Oriental Programming

P

PC = Personal Computer

PCB = Printed Circuit Board

PSK = Phase Shift Keying

R

RAM = Random Acces Memori

RF = Radio Frequency

Rx = Receiver

T

Tx = Transmitter

TLx = Timer Low Byte

THx = Timer High Byte

TRW = Transmitter Receiver Wireless

TTL = Transistor-Transistor Logic

S

SFR = Special Function Register

U

UART = Universal Asynchronous Receiver Transmitter

V

VB = Visual Basic
