In this paper, the authors develop a system of payment of levy information is not a customers Air kotor in PDAM Bandung city. The purpose of creating this system is to help staff the dirty water in order to know the dirty water of payment data in detail, but it can make dirty water staff in preparing reports each month.

Wastewater treatment is a new program of the Government of Bandung City to realize its mission of K3 (Cleanliness, Order and Beauty), whereas in the data processing taps themselves are not effective and had difficulty in preparing the report. From the test results obtained the conclusion that this may facilitate the application of dirty water staff in doing their job.

Key Word : PDAM, system,information, dirty water
