ABSTRACT

Hiroz Futsal is a business engaged in the rental services futsal field. Hiroz Futsal Futsal is one place that pretty much liked by the lovers of futsal. However, in the futsal hiroz transactions that occur as data recording tenant, tenant data recorder, the recording of maintenance data is still written by hand and stored in a large book and MicrosofExel. So Hiroz Futsal is in desperate need of a system for officers in pengelolahan leasing transactions, as well as tenants and the data pengelohanpengolahaanHiros maintenance data in Futsal. So with the authors of this study is expected to make a rental information system that will help improve the performance of the officer.

As for the method - the method used to complete this thesis research is a method of object-oriented approach to using the system while the system development method used is a method of RUP. While modeling the system using the unified Modeling Language (UML) using the Java programming language while the Software Tools used is NetBeans IDE 6.8 and MySql as the database.

For Hiroz Futsal is expected to provide alternative and solution for improving performance, both in data processing tenant, leasing data processing, data processing maintenance and processing of reports - the report. So with this information system can help improve effectiveness in data processing. And will help make the decision to be taken to improve Hiroz Futsal

Keyword: UML, Rental, Hiroz Futsal.
