Completed WEB with Multiple Files

Cara mudah membuat web dengan menggunakan beberapa file adalah dengan mempersiapkan web page (*index.html*) terlebih dahulu beserta *link* sesuai dengan target file yang sudah direncanakan terlebih dahulu, misalkan *link* untuk file *news.html*, *tutorial.html* dll pada menu.

Setelah webpage lengkap, langkah berikut adalah menduplikasi file tersebut (save as : news.html) dilanjutkan pada tahap editing content sesuai dengan tema. Hal itu terus berulang hingga semua link terhubung dengan benar.

Untuk lebih jelas bisa dibuatkan contoh seperti dibawah ini.

Sample Source code completed HTML files. (file gambar harap disesuaikan dengan *image source* yang ada)
