This research under the guidance,

Drs. Manap Solihat.M.Si

This study aims to describe the Women Lifestyle Single Parent in the city of Bandung in the Environmental Works. To answer these objectives, then that will be analyzed in this study about the activities, interests and self-image of women single parent.

This study used a qualitative approach to the informant, amounting to 3 (three) and 1 (one) key informants. The data obtained through in depth interviews, observation, literature study, searching the internet. The data analysis technique used is the selection of data, classification data, formulating the research analyzing results and drawing conclusions.

The results showed that among single parent female student city, ***Activities*** *work activities as a career woman and activities outside the work environment,* ***His interest*** *in where want to have spouse or do not want to have spouse, and* ***Self-image*** *more visible female single parent of woman strong and tough after residence of her husband.*

The conclusion of the Single Parent Lifestyle Women in Environmental Works a single female parent is more to do as a workhorse for the next focus on hisfamily life, especially after the residence by the husband.

Suggestion that researchers can give is keep being a single parent woman who is keep being a single parent woman who able to face anything that happens in the rest of their lives an cheer up though now they are working hard to play a double role as mother an father to son – his son.
