Family Pharmacies Kurlaefi is a company engaged in the sale ofmedicines and equipment. As for the ordering process, data processing and transaction processing has been done still manualso that there inefficiencies in the use of time and effort, but it alsowants to expand the pharmacy owner jangkaun business. Thus theneed to think about how to build e-commerce website keluarga Kurlaefi pharmacy.

Analysis model used in building a website is structured modeling analysis with tools that are used are DFD, ERD and Flowmap. It is expected that with the design of computer systems, dataprocessing, sales and payment transactions at pharmacies Family Kurlaefi can run more quickly and easily.

Based on the results of implementation and testing web-basedinformation systems sales on Family Pharmacies Kurlaefi can be concluded that the process of ordering and sales transactions can be done online so that it can be done anytime and anywhere andreach a larger market.
