Prestige of Motor Sport is a shop that sells various types of motorcycle spare parts and accessories of various brand. Currently, the workshop Prestige Motor Sport promotion of goods are still done manually, using flyers brochures in the spread to communities around the garage prestige motor sport. Therefore the prestige motor sport intends to expand its marketing by utilizing Internet technology, using e-commerce website.

For software development methodology that is used is waterfall methodology. In this methodology is done several steps to build a software, namely: software engineering, systems analysis, system design, system implementation, system testing, and system maintenance. By running the stages based on the existing methodology, the website built is expected to suit your needs and can be used by the customer.

E-commerce website created to increase product sales, simplify report creation and sale of products into the media information and can be easier for consumers to see the latest products, without coming to the shop directly. For payments not only through the transfer, but buyers can also pay through online payment.
