This thesis under the guidance of:
Adiyana Slamet, S.IP., M.Si.

The purpose of this study was to determine the extent of the legal content of the news agency AFP news agency the Bureau of Bandung in terms of function paragraph of the container main idea, facilitate understanding of the way the reader's mind, gave birth to a systematic way of thinking, and directs the reader to follow the author.

This research uses descriptive method, with content analysis techniques. Data collection techniques used in this study is library research, and interviews. The number of samples contained as much as 8 news 66 paragraphs from January to February 2011. Sampling technique used is total sampling.

From the results of research through an agreement of the pengkoding obtained results that the presentation of law in the ANTARA News Jakarta Bureau during the period January to February 2011 showed that the presentation of news by category placeholders main idea with the sub categories as many as 36 logical paragraphs with the percentage of 54% and for sub categories systematically as much as 35 paragraphs with the percentage of 53%. Category facilitate understanding of the mind with as many as 35 sub-categories of effective paragraphs with the percentage of 53% and for the sub category of communicative as much as 35 paragraphs with the percentage of 53%. Systematic way of thinking gave birth to a category with sub categories deductive patterns of paragraph 28 paragraphs with the percentage of 42% and for the sub-category pattern Inductive paragraphs were 38 paragraphs with the percentage of 58%. Category groove author directs the reader involved with the sub categories of binding the reader's mind as much as 46 paragraphs with the percentage of 70% and for the category of sub readers feel pampered as much as 20 paragraphs with the percentage of 30%.

Overall conclusions of the study that the presentation of the legal news in ANTARA Bureau of Bandung in January to February 2011 is quite feasible with the function of paragraphs. it can be seen on the results of coding that researchers are doing.

As for advice for companies is ANTARA retaining the function of paragraphs in each presentation of the legal news. ANTARA and can provide guidance and training to students and students who conduct research in making good news.
