## *ABSTRACT*

***Derliana (44306011) "Implementation of Indonesia Japan Economic Partnership Agreement (IJEPA) for Indonesia's particularly Fishing Sector In Commodities Shrimp And Tuna". Department of International Relations Science, Faculty of Social and Political Sciences, Indonesia Computer University, 2011.***

*Still, Japan is the primary destiny in export, shrimps and tuna from Indonesia. In the other hand, Japan is the Indonesia's trade partner and economic cooperation between two countries has been taking place for long time, since the financial aids was given by Japan called Official Development Assistance (ODA) to Indonesia. Those are basis for economic cooperation which called Indonesia Japan Economic Partnership Agreement* (*IJEPA) was established since 2008 with numoreus of tariffs decreasing for Goods and Services.*

*Research of this method is explanative-deductive where is by this method will able to describe correlation between both of two variable include the influence which is caused by one variable to other variable*

*.By this method, researcher can describe how economic cooperation in the IJEPA framework could increasing economic growth in the commodities export, particularly Shrimp and Tuna to Japan.*

*Hypothesis of this research is:* ***" if IJEPA Framework could be implemented as well, then it can increasing export value Indonesia to Japan particularly in Commodities of Shrimp and Tuna".***

*The conclusion of this research is IJEPA cooperation between Indonesia – JAPAN is success. That point is increasing of economic growth in export Shrimp and Tuna from Indonesia to Japan.*

*Keyword : International Cooperation, Indonesia Japan Economic Partnership Agreement (IJEPA), Commodities Of Shrimp and Tuna, Particularly Fishing*
