The national examination is one of the activities of the curriculum implementation carried out the end of each school year attended by all students in grade VI (six), IX (nine), and XII (twelve) in order to complete one educational level to enter the education level is more high. If students do not pass the national exam, the student is not able to continue their education to pursue higher degrees.

Department of Education in Cimahi is the parent organization that manages educational and lead all the schools in the city of Cimahi trying to get all students in Cimahi which will follow the national exam to graduate with good grades. Therefore, the city education office Cimahi made a breakthrough in building a national system of web-based exam tryout.

Tryout system of national examinations is a web-based transfer of the tryout process is still manual become computerized. With this system tryout and correction process is done automatically so that answers can be directly observed values after students have finished working on the problems tryout through this system.

Based on the results of testing, this system is considered to be quite good in the tryout process with randomized questions and immediately presents the results of the tryout form and the number of graduate students who followed the tryout.

keyword : ***tryout, sistem tryout, sistem tryout ujian nasional, E-learning.***
