Drs. Alex Sobur, M.Si

The purpose of the study is to find out inside of construction of reality of sue Indonesia speech text. In this case, two big questions appear, they are how is the dimension of social cognition of sue Indonesia speech text and how is social context of sue Indonesia text.

The writer uses qualitative approaching and critical discourse analysis research method. As well as, the data aggregation technique is documentation, deep conversation, literature study and searching by internet. Informants selected as many as three people assuming they know a lot of information about the text to be studied. While the results of in-deep conversation conducted categorization of questions and answers that presented, which then critically analyzed according to the method of critical discourse analysis.

The result of the study is it shows that Bung Karno is a great orator and good language user. Every choice of words has firm, deep meaning. While on the dimension of social cognition shows that he's an intellectuall, and society person he's also a Javanese, he's loved the motherland and the people of Indonesia, and he's good religious. Furthermore, dimension of social context shows that people on that time is the result of Holland government propaganda and agitation that he did all this time. Even though, there're so many opinions evolve at society, local society are still supporting and respecting him as their leader.

The conclusion is capitalism and imperialism is the cause of the colonialism in the world. The history of mankind said that so, and yet, the text of sued Indonesia is a consistency of Bung Karno to counter those two ideologies.The writer advice is we should keep and look trough of history on whatever aspect in order to find national identify so that we can step and go to the better future.
