ABSTRACT

Order Center is a computerized service that is created with the aim to ease the work of employees in the Treehouse Cafe. So the computer cashier and computer consumer is connected to computer kitchen. When consumers come to Treehouse Cafe, the consumers can directly order the menu through a computer is the desk. By the head of kitchen (Sous Chef), the consumer menu will be printed and given to Cook. After all the menus are given to the consumer then Sous Chef gives confirmation to the cashier through the computer that a customer order has been granted, and the cashier print orders fee bill and gave it to the consumer. Then the customer gives money orders and bill to the cashier and the cashier will be printing payment receipt as proof that consumers are already paying the cost of the order. Sous Chef and Accounting will always gives daily reports to the Restaurant Manager.

In this research, the writer use the methods of field research in the form of interviews, field observation and literature. As for the method of system development, the writer uses prototype method. And to realize the design of this program, the writer uses some software. Some of them are the XAMPP as the server, Macromedia Deamweaver to the editor, Adobe Firework to design the look and Mozilla Firefox as a browser.

With a center order online of information system is expected to accelerate and facilitate consumer menu list sent to the kitchen.

Keyword: Order Center, online, intranet.
