CHAPTER II

THE GENERAL DESCRIPTION OF COMPAC – FEMALE

2.1 General Description

COMPAC – Female (Community – based Prevention and Care for Most-at-Risk Females) is a collaboration program between TB working Group Health Research Unit and Padjadjaran University. This organization focuses on sexual reproductive health and life skills education related to HIV-AIDS for females. COMPAC - Female is funded by CORDAID to train nurse and midwife in order to improve their knowledge and skill in delivering health services to community, especially for females.

Since its main goal is to improve HIV-prevention and care for Most-at-Risk Females in West Java, it develops modules and preparing Master Trainer Training related to HIV – AIDS for nurses and midwives that will become the trainers for 9 selected cities/districts in West Java Province. This program is conducted together with The Faculty of Medicine of Universitas Padjajaran, especially COMPAC Female UPK FK and Public Health Department of Faculty of medicine, Indonesian Midwife Association of West java Chapter, Faculty of Nursing of Universitas Padjajaran, Health Care Division of West Java Provincial, and West Java AIDS Commission and Hasan Sadikin General Hospital.

2.2 The Objectives of COMPAC – Female

With the goal to improve HIV-prevention and care for females in West Java, COMPAC – Female has several objectives as follow:

2.2.1 General Objective

To improve the capacity in prevention, treatment, and care of HIV/AIDS program among most-at-risk females in West Java.

2.2.2 Specific Objectives

1. To improve the education for adolescent and female in West Java through the implementation of Puskesmas outreach program including the participation of public health workers (nurse and midwife) as well as government and private sector.
2. To increase the knowledge and skills of nurses and midwives in nine selected districts/cities with most HIV cases and skill related to HIV-prevention.
3. To prevent the nosocomial and HIV infection to the health workers

4. To strengthen Home-based care service in community conducted by nurse and midwife
5. To contribute to the MDGs attainment for West Java in the form of strengthening first-line provider skills, referral system and home-based care system in the community.
