ABSTRACT

CV. Belanja Disini is not a bad company in the business world. The company, founded by Mrs. Damayanti Hestri, and he is one of the pioneers of online sales businesses that use social networking sites to promote. That is regarded as the foundation to building a better company. For that, CV. Belanja Disini need to innovate on their system, one of which is to build a software that will be a weapon to compete with the another company.

The methodology used in the manufacture or use of information systems web-based online sales is a prototype methodology that includes the identification of user requirements, making prototype, testing prototype, repairing prototype and development of the production version is expected to menbantu in the design of this system as well as design studies using the method observations and interviews. The tools used to describe the system model is a form of data flow diagrams (FlowMap), context diagrams, and Data Flow Diagrams (DFD), as well as in database design using a data dictionary, normalization, and Entity Relationship Diagram (ERD). Program E-commerce applications using PHP, Macromedia Dreamweaver 8 and Apache Triad as a Web server with My SQL as Database.

The results showed that the design of information systems sales in the CV. Here a web-based shopping can help consumers in accessing information on apparel products are sold, implementing information systems that include software implementation, hardware, database and interface of the resulting application. The final stage is to conduct the testing of applications using the Blackbox

The results of the sales information system design on the CV. Belanja Disini with a web-based is expected to assist consumers in accessing information on apparel products are sold, and overcome all the problems that exist in the old system. However, these applications still need to be improvements and additions to make it a perfect application.
