Abstract

The air pollution caused by the use of motor vehicle is getting worse with the amount of motor vehicle user with oil fuel; the air pollution can cause negative impact towards society life. The air pollution level is high in several big city in Indonesia, such as Bandung, there are 70% air pollution in Bandung is caused by exhaust emission of oil fueled vehicle, those pollution cause the air quality become low and the temperature become high, traffic jam, health disorder, and global warming. The problem concerned by writer is how the role of undang-undang no 32 year 2009 about environment protection and management towards the use of motor vehicle that cause the increasing of air pollution, and how the role of undang-undang no 22 year 2009 about traffic and transportation towards the increasing of motor vehicle user that cause the increasing of air pollution.

This study applies juridical normative method and descriptive analytic approach, with this method it is hoped to get the wholly and systematic description about a case that is being observed and then analyzed based on the facts in form of gained secondary data from primary legal material, secondary legal material and tertiary legal material, then analyzed with constitution rule in Indonesia.

According to study result it is concluded that, the first, the role of undang-undang no 32 year 2009 about environment protection and management in the use of motor vehicle user that cause the increasing of air pollution is the existed of good and healthy environment for society, however the less effectiveness of law enforcement in environment become the obstacles factor to have a good and healthy environment. The second, the role of undang-undang no 22 year 2009 about traffic and transportation towards the increasing of motor vehicle number that cause the increasing of air pollution is to lower the amount of exhausted emission, the less effectiveness of undang-undang no 22 year 2009 about traffic and transportation become the obstacles of pressing amount of motor vehicle exhaust emission.
