ABSTRACT

This research is performed on order to test the influence of the variable Growth Company, and Profitability toward Capital Strucutre Population for this research is Foreign Exchange Mining Company Listed in Indonesian Stock Exchange Period 2011 – 2013. The number of sample that examined after passed the purposive sampling phase is 15 Mining Company.

The analytical method used is descriptive and verification methods and data analysis technique used is multiple linear regression and hypothesis testing using t-statistics to test the partial regression coefficients and F-statistics. The test is also done classical assumptions including normality test, multicollinearity test, heteroscedasticity test and autocorrelation test did not find any variables that deviate from the classical assumptions. This research used aplication SPSS 20.0.

The result of t-test shows that Growth Company have positive significant influence to Capital Structure. Otherwise, Profitability variable have negative significant influence to Capital Structure. The result of the count can be known that Growth Company have the great influence to Capital Structure.

Keywords: Growth Company, Profitability, Capital Structure.
