ABSTRACT

By

Ahmad Yazid Bustani

Home Industry Agung Kebaya dressmaker & Wedding Service that addresses Jl. Asep Berlian Gang Bpk Aha 2 No.11 Cicadas Dalam, Bandung, is a trading company engaged in the sale of kebaya, established in 2005. In the process of business is still done manually, causing a buildup of documents and frequent occurrence of errors in recording the purchase and sale transactions goods, as well as the lack of preparation of reports, so that the performance of the company has not been effective and efficient.

In conducting the study, the authors used survey method and descriptive method in which the authors conducted structured interviews to obtain data and facts as well as the problems that exist in the company then explained in paragraph form. In addition, the authors also ask for some sample data and files involved in the transaction on the company.

Based on the above, the authors decided to create a system of sales information on Home Industry Agung Kebaya. Hopefully, with the establishment of this system will be the solution of existing problems and can improve performance and profits at these companies.

Keywords: Information Systems, Purchasing, Sales.
