ABSTRACT

Traditional songs are songs or music coming from a particular region and became popular sung well by the people of the region as well as other people. But as the development of modern songs and foreign interest of the community, especially the children of the track area decreases.

In an effort to improve the efficiency of the application that contains the necessary elements of education and culture of various alternatives and new innovations in terms of programming to be applied as a tool to facilitate the learning process and the introduction of culture. One way is to design a mobile application.

This mobile application built to follow the development of mobile technology today, namely android based technology platform. System development methods that use this approach to build a program quickly and gradually so quickly can be evaluated by the user.

With the song recognition application area is the younger generation was expected to be able to know and love songs regions of this nation.
