Information needs for various community groups to be very important at this time. Likes mobile phones, laptops, notebooks, and mobile devices. Almost all people from various circles are familiar with those terms. Mobile information medium of choice most popular because almost every person needs the information easily, quickly, and can be accessed anywhere at any time so as to streamline the time it carefully.

Information systems is growing very quickly at the moment. The impact of this development can also be seen on the flight information which much needed by society at large. Such as flight information display sytem are usually informed only flight at the airport. So as customers or prospective customers is difficult to get information if there is no airport, With the website and adaptable mobile applications are expected to make it easier to see and Searching flight info in Husein Sastranegara Airport. This application is also coupled with supporting features, steer users to the webrowser at several airlines , It making easier for the application users to view up and reserve plane books ticket.
