Story of the prophet is stories that can be used as a model for Modeled prophets. In general, the prophet stories is be telled to children, because the properties of the prophet and the mandate contained in the story of the prophet is very good, to be delivered to children in our days, that children can develop into a person of good character.

The book is media that commonly to tell the story of the prophet for children. the book is simple and easy to use anywhere make books as an option that is widely used in telling the story of the prophet for children. However, media such as books have parts that easily damaged and less interactive in telling the story of the prophet because the information media such as books can only be read by children.

Android operating system is the operating system used on the smartphone. Android operating system has supports text to speech system (TTS), a system that can conversion of text to speech. This feature is also known as "speech synthesis", TTS allows the android to speak a different language. Android supports data communication with the server using the internet. One of the techniques used to communicate with the server is HTTPConnection

With an excess of the operating system android, so built an application is the application of the Prophet Stories. An application running on the android mobile platform which gives the prophet storytelling use text to speech technology and sources of data from the server that accessed using the internet. With the story of the prophet applications, users can use this application as an alternative medium to read and hear the story of the prophet that is easy to use anywhere and receive a prophet interactive storytelling and easier for users to remember.
