The proceed income and finance managing (DPPK)of Bandung district is a Dines that have a duty to manage the income and finances. The stock supply and DPPK merit have many problems there are, it's hard for supplier to get the information about stock supply process and merit, to cause there is not transparent information of stock supply, and the difficult of doing the administration process.

The application e-procurement built in proceed income and manage finances is divided in two part, there are for committee and supplier. In the committee website can manage the process of supply, the thinking of price, the offer process, manage aanwijzing process, accepting, while for the supplier can do it in the online registration that can manage prequalification data, can do offer process and provided the supply document online.

Based the alpha and beta research can conclude that the system of functionality results output that`s hoped. The application e-procurement build in the process income and manage of finances, can easier the stock supply process and merid, the application has been done online, can easier the administration process, can creating the healthy competition between supplier and merit, e-procurement application can transparent media.
