Public auction is a method for selecting the supplier of goods/construction work/other services for all the work that can be followed by all providers of goods/construction who work/other services are eligible.

Department of Animal Husbandry and Fisheries of West Bandung regency had difficulty in public auction process because it is still done manually using Microsoft Word and Microsoft Excel. Announcement process was carried out through mass media and official notice board so that the general public, especially provider of goods/services difficult to obtain such information, in the administrative process is have difficulty because of space limitations of the procurement committee secretariat of goods/services used in administration, every supplier of goods/services who will be queuing up to register in advance because it cannot handle the registration process in large quantities. Due to the requirements of the first providers of goods/services which form an application form and supporting documents, it is feared there are some data is missing that would cause problems between providers of goods/services and the procurement committee of goods/services.

With various problems and constraints that exist, then the proposed a solution is making an application of the public tender in order to provide facilities for the procurement committee of goods/services in carrying out the public tender process in the Department of Animal Husbandry and Fisheries of West Bandung regency.

Based on the results of the study and after doing alpha and beta testing of the system that has been made, the conclusion is that applications built to accelerate the registration process, simplify the administrative process of procurement of goods/services, easier for providers of goods/services in the latest information on the procurement of goods/services will be held, and simplify the procurement committee of goods/services in the reporting of procurement of goods/services.
