Indonesia have a lot of diversity of animal wildlife, especially flora and fauna of marine life. Many of these were living on the islands and seas of Indonesia, and now it started to decrease significantly.

But, there are still many thefts of turtle eggs that leading to a reduction turtle populations in Indonesia, especially at the Pangumbahan beach Ujung Genteng Sukabumi. Therefore, it takes effort to anticipate a decrease in green turtle populations.

Therefore, it takes effort to keep the green turtle population by a socialization to Pangumbahan coastal communities to preserving and guard the green turtle eggs for not to become extinction.

Key words: egg, green turtle, Population, Beach area Pangumbahan
