ABSTRACT

The research was conducted at Home Business Simbosis Bandung, what occurs is a lack of supply of raw materials to companies that berakibatkan production process becomes blocked when supplies of raw materials into raw materials before production takes place in order to meet the housing industry must take into account the symbiotic purchase of raw materials so that not occur if the deficiency in the production process when the raw material that is damaged then the workers do not have to wait for the purchase of raw materials. The purpose of this study is to determine the effect of raw material inventory control of production processes. The method used in this research is descriptive where the researcher does not change, add or make manipulation of the object and expose it just look in the form of reports penelitiam in a straightforward and candid. Research has been conducted by the author, menujnjukan that supply conditions are less good Home Business Symbiosis can be seen in the frequent shortages of raw materials for production processes, so that the target was not achieved in the finished product is a calculated profit berakibatkan not be worth an additional purchase of raw materials , Home Business Symbiosis London should buy raw materials inventory in excess of that needed so that when there is material that is damaged then the production process does not have to wait for additional material and more careful in the purchase of raw materials.

Keywords: Control, Inventory, Raw Materials
