This study aims to determine the self-concept drug users in the Bandung city of Cimuncang futsal community. The purpose of this study is to know the drug users themselves interpret it as a drug user in the city of Bandung. To find out the significant others of drug users in the community make sense of futsal cimuncang town bandung and how to interpret the reference group of drug users.

This study used a qualitative approach and the phenomenology method, informants used in this study amounted to 13 (thirteen) people. The Data obtained through unstructured interviews, participant observation, internet searching, documentation. The data analysis techniques used are data collection, data reduction, presentation of data, get a conclusions. And test the validity of data through triangulation, discussions with peers, and memberchek.

The results showed that drug users make sense of him self as adrug user view by using the drugand then the drug users get a sense of confidence, stamina and powerto interpret other significant concentrations of drug users and this is danger and not properly to interpret there ference groups of drug user swith no need to stay away from them but provide motivation, understanding,and counsel.

The result scan be concluded that drug in the Bandung city of Cimuncang futsal community affected by the significant other and the concept of self reference group. That drug user sand drug view negatively even Though they can produce a sporta chievement sparticularly in futsal. They should to stop using drugs prior to sport.
