This Research *aimed to find out the Communication process of Arabian descendent society in Panjunan at Cirebon City in interacting daily with fellow Arabian descendent. To solved this case then raised research sub focus such as : Face to face, message, languange and obstacles communication process of Arabian descendent society each other.*

The approached of this research *is qualitative with the study descriptive. Informer was choosen by purposive sampling technique, for the main informer totaled 4 (four) people from arabian descendent society at Cirebon city, and for clarified and strength the data, there must be infomer key totaled 1 (one) people. The research data obtained through from observation non participants, deeply interview, documentation, study of library, and tracing data online. To test the validity of data used triangulation data technique. As to analyse technique of the data by reductioned of the data, collected of the data, presented of the data, drawed a conclusion and evaluation.*

The research results showed that *: **Face to face** is being expressive whereby arabian descendent society began with greeting, greeti in Arabic, shake hands, kisses cheek left and right, in the process of communication there were **message** contained and understable each other by the fellow arabian, for told the message used Arabic **languange**, Indonesian, Cirebon, and gestures. The **obstacle** communication process was cultural factor that maked the communivation did not effective.*

The conclusions *were began from a face to face that showed an expression which were contained message and for told that message used verbal and non verbal language, cultural factor as the obstacles in this communication process, therefore did not working effectively.*

Suggetion *for arabian descendent society should broaden their knowledge of Arabic language, maintaining their characteristic of face to face which was being expressive and maintaining the characteristic of language as the cultural identity.*

Keyword : *Communication process, Face to face, message, languange, obstacle*.
