Research *aims to see how lifestyle members slankers priangan creativity in bandung raya as a study phenomenology about lifestyle members slankers priangan creativity in bandung highway. So as to can see how big lifestyle may community slankers by covering activity, interest, motivation and a lively style of community slankers in bandung highway.*

Methods used in this research *is by using tradition phenomenology with the theory of substantive construction social reality. For the collection of data deep, conducted an interview observation / observation participatory, the study kepustakaan and the internet searching. Pemilihan informant purposive sample of the, conducted by ways of aimed at because samples to be taken relative small with certain consideration sesai with research purposes. Engineering analysis of data used that is, with the data collection, data reduction, data display, and drawing conclusion (verification). While to test the validity of data used triangulation data. Triangulation data which is to check the truth by overcoming differences that exists when gathering data*

The result *showed that someone has an aktivtas, the activity of members slankers here as work, to go to school, and were doing things that have usually done while interest slankers which is against a member of all the works created by a band of slank like lyric, her songs and all activity that is performed slank, the interest that just want to get access for obtaining drugs and motivations of slankers which is there are the motivation onefrom difficult to gain access because their real slankers and difficult to meet with a band slank for that after joining their access to be better to meet and talk with personnel band slank then becomes easier. A lively style of members slankers pretending to denote that they are in line with what is usually they were doing. But there ' s a thing that is different when in a community and outside the community.*

Drawing conclusions *of this research is a style of life of members of slankers consisting of life style with activity, interest and motivation being diverse who is strongly influenced by himself, and people around him or community. The formation of life style involving a custom that which has significance*

Of this research result obtained advice namely untuk slankers should be more often to hold activity a positive as a member of the young generation should slankers away from things that violate the law.
