ABSTRACT

The skripsi entitled ***"Action Orientation*** **Pada Karakter Mole Dalam Novel** ***The Wind in The Willows*** **Karya Kenneth Grahame".** *It discusses about the action orientation that happened to Mole in the novel. This skripsi used The Social System Theory by Talcott Parsons. This theory contains Adaptation, Goal-attainment, Integration and Latency (AGIL). The writer uses descriptive methods in this skripsi, it uses to explain and to analyze the data. Based on the analysis of the data, the writer concludes that action orientation happens when a person have a strong determination to attain the goal. In the process to attain his goal, Mole has to interact with other people. During the interaction, Mole should do the adaptation, and in order to achieve integration he need to adjust his value with the others, so the agreement can be reached.*

Keywords: Action Orientation, AGIL and Interaction
