ABSTRACT

This research is entitled Clause Complex Analysis in "No Greater Love" novel by Danielle Steel which is purposed to analyze the logico-semantic relation. It is showed by clause complex. In addition, the writer uses qualitative-descriptive methods in this research in which the data is qualified based on taxis relation classification, then it is described based on logico-semantic relation.

The result of research indicates that 6 data of hypotaxis clause complexes show elaboration-enhancing relation and 2 data of parataxis clause complexes show extending relation. In addition, 3 data of parataxis and hypotaxis clause complexes show extending-enhancing relation and 2 data of parataxis and hypotaxis clause complexes show enhancing-extending relation. Based on data analysis, it can be concluded that parataxis clause complex always shows extending relation and hypotaxis clause complex always shows elaboration and enhancing relations.

Keywords: logico-semantic relation, taxis, clause complex.
