IT IS NOT DIGITAL, IT IS EDUCATIONAL

- No longer address the "digital divide" just by providing access
- Provide training on online privacy tools
- Work with such organizations to protect user's privacy more broadly.
- Work with open-source developers to deliver products and practice of open-source development

The diffusion and sharing of knowledge—the public good par excellence

- "Knowledge and skill diffusion is the key to overall productivity growth as well as the reduction of inequality both within and between countries"
- "The technological convergence process may be abetted by open borders for trade, but it is fundamentally a process of diffusion and sharing of knowledge—the public good par excellence—rather than a market mechanism"

Piketty Thomas, 2014. *Capital in the Twenty-First Century*. Cambridge, MA: The Belknap Press of Harvard University Press, p. 21
