This study evaluated the use of slang phenomenon Transgender Community By Himself For Identity In the city of Pontianak. The purpose of this study was to find out how to use slang language among transvestites to show their true identity to the surface so it can be seen by people in the city of Pontianak.

The method used by the authors in this research is descriptive method with the direct approach by using a qualitative approach to the informant, amounting to 3 (three), and 1 (one) as an informant supporters. This data was obtained through in-depth interviews, observation, literature study, searching the internet. The data analysis technique is the first data collection, the data classification, three data analysis, the final data analysis.

Results of research in the field showed that the transsexual can show identity by using the communication process, the relationships and the phenomenon of the use of slang is happening in Pontianak that transvestites can be received well by the city of Pontianak.

In conclusion the process of communication that takes place using slang language contributes to the drag queen received her with them into the part of society, while the process of relationship is beneficial for transsexuals because it has been accepted by the community and make relationships with transgender people become more closely, while the phenomenon slang that occurs among transvestites make them more confident with the slang that shows their true identity.

Advice for transvestites, expected to contribute more, both from the fields of language, economics and art / entertainers in the city of Pontianak community in particular.
