The existence of mosquitoes since the long ago are inseparable of human's life. There is an interaction between human's and mosquitoes, which sometimes gives a personally problem for human's. Human's are often disturbed with the presence of mosquitoes and disease which carried by mosquitoes, not infrequently mosquitoes can carry disease viruses that are dangerous to human lives. Habits and less of public awarness of hygiene and health often adds to the existing environmental problems. Lack of comprehension and information about the spread and the life cycle of mosquitoes often increases the risk of mosquito bites. Therefore importance was made a media that discussed the spread of and life cycle of mosquitoes for the community. Media video infographics chosen because it can be disseminated to the public through social networking and websites. With the hope that all circles of society can understand and more alert of the dangers caused by mosquitoes.

Keywords: *Video, Infographics, Spread, Cycle, Mosquito.*
