Final report entitled "Designing Media Learning Reading the Qur'an with Ummi Method Using Media Interactive CD". The purpose of making this Final report is a graduation requirement for the course Final. This it can be seen this influential report to the author.

Ummi method is one method of reading unique the Qur'an. Expected for anyone who can not read the Qur'an well and truly be able to use this method, be it children, teenagers, adults, and parents. Reading the Qur'an is an obligation for muslims, especially Indonesia is the country with the highest Islamic religious majority of the world.

With the presence of many methods of reading the Qur'an spread in Indonesia is a good news, because it can easily be people who want to learn to read the Qur'an. One of them is the method Ummi, the presence of these methods will provide benefits for the Indonesian people who want to learn. Not only children, this method is also suitable for adults and the elderly. So there is no longer a reason people, especially the muslims to want to learn to read the Qur'an. Because the Qur'an real is a guide for muslims.
