History is important part in the human race, and is part of the past. With knowing the past, every human being can learn something from his fault to became a better personal or better system. History is part of the future, for example, maybe if we never invented a plane, today will there aren't a jet plane. Or if we never found a communism, liberalism, even democration, process of organisation never been as developed as today.

A lot of part to create and form a history, one of them are the people it self, and a lot of people one of them is a president, who are a leader of organization or a state. In Indonesia when the freedom justified in 17 August 1945 until 2015, there are seven president who were in the office until now. They have different character to write they own history to the nation.

Therefore meaning of history for new generation is to prepared them so that can serve his duty in the future. But in fact, history didn't work the way it is to the audience which is the youth generation, because of media for telling the history there is problem in it. From teks book, who is boredom, and language style did not proper with the audiens.

Keywords: History, President, Indonesia, Ilustration
