CHAPTER IV

CONCLUSION AND SUGGESTION

4.1. CONCLUSION

To introduce English to Beginner learner or children, we must use an attractive picture. Using picture in the poster will make learning English much easier and fun for the learner to remember the picture and the English term. In order to make good design posters, the choosing the proper picture according to the marketing target is a must. The reason why most of the picture using a cartoon version of the objects, it's because the marketing target are beginner learner or children. That's why before making the posters we have to collect all materials we need using many media, one of them is internet.

4.2. Suggestions

There some suggestions for both English Department and for student who will take entrepreneurship course on job training as follow:

1. The student must prepare a good business plan and to build the company with at least three person in it. And manage their company well to get a benefit or valuable experience in running the company. And for The English Department considering Entrepreneurship course to encourage the student to take the job training in Entrepreneurship field.

2. Second for Student who wants to use Internet as the source of the material. It can provide you fast searching for materials you needed, if you put the right key word. And if the materials what you need still to general all you need to do is type more specific word of to find it more specific resources. Internets also have a disadvantage if you not carefully in collecting some materials or data you would easily fall into Cybercrime. So be specific and carefully is the key to collecting the data from this Media.
