CHAPTER IV

CONCLUSION AND SUGGESTION

4.1 Conclusion

As a linguistic technical staff in Balai Bahasa, the writer has to find language phenomena in the society. The writer found a phenomenon of mixing code in face book status. The writer found some facebook users are mix their English code into Indonesian code.

Based on the analysis, the writer found that the facebook user are used Inter-sentential mixing code type for the datum 1 and Intra-sential mixing code for the datum 2, 3, 4 and 5. For the reason their mix the code is for" expressing group identity" based datum 1, 2, 3, and 4 because they are mostly young teenager who wants expressing their exciting status by mix their code. The last reason-based datum 5 is "Being emphatic about something," the facebook user wants to express emphatic status about their feeling.

4.2 Suggestion

For faculty, the writer suggests that for next job training the faculty should giving company references for the student to appropriate the major study applying.

For the Balai Bahasa Bandung, the writer suggests to give more explanation for the task given.

For students who will do job training have to prepare our knowledge and skill for facing the job training.
