ABSTRACT

This research is performed on order to test the influence of the variable Financing to Deposit Ratio and Third Party Funds against Mudharabah Financing. Population for this research is Islamic Banks financial reports Listed in Indonesian Bank Period 2012 – 2014. Sample in this study consisted of 36 financial reports from 12 mining Islamic banks in the observations with a purposive sampling as a sampling method.

The analytical method used is descriptive and verification methods and data analysis technique used is multiple linear regression and hypothesis testing using t-statistics to test the partial regression coefficients and F-statistics. The test is also done classical assumptions including normality test, multicollinearity test, heteroscedasticity test and autocorrelation test. This research used aplication SPSS v21.1.

The result of t-test shows that Financing to Deposit Ratio have positive not significant influence to Mudharabah Financing. Otherwise, Third Party Funds variable have positive significant influence to Mudharabah Financing.

Key words : Financing to Deposit Ratio, Third Party Funds and Mudharabah Financing
