Indian Zone Banjaran Bandung branch is one branch that lies far away from the reach of the owner, so the owner of the difficulty to evaluate the increase and decrease in sales as well as difficulty monitoring inventory

Based on the constraints that have been described are then designed an information system that can solve problems by applying some theories such as the theory of Monitoring, Prototype models, flowmap, Context Diagram, DFD, ERD and the making of programs using software tools Wamp Version 2.5 with Web designers Macromedia Dreamweaver CS6 ,

Once the software is designed completed, then the required testing of every functionality. So software designed for use in Indian decent Zone Banjaran Bandung branch.

Keywords: Information Systems, Monitoring, Sales, Supervise, Inventory
