In Indonesia, photography has developed quite rapidly. Can be seen from the increasing number of photography enthusiasts, members of the community or organization photography, the development of technology for the tool - the tool of photography. Federation of Photographic Societies Indonesia was founded in 1973 but its existence is little known by photographers and photography community is caused by a lack of socialization and media information provided. This federation has the strength and could become a great organization because the only federation in Indonesia, which merge into a federation FIAP photography world level. With a solution made of conducting this research the authors expect the existence of the Federation of Photographic Societies Indonesia increased both in Indonesia and in the eyes of the international community.
