CHAPTER IV

CONCLUSIONS AND SUGGESTIONS

4.1 Conclusions

According to the analysis, it can be concluded that:

1. The titles of the articles in ITB journal have complex proposition because they are combination of some propositions.
2. Proposition in the titles of the articles in ITB journal is made from noun phrase and prepositional phrase through paraphrasing the concept.
3. Proposition is made by showing the predicate in the concepts paraphrased. So it will show the relation between propositions in a referring expression.
4. Proposition makes the information in the titles clearer so it can be transfered into *bahasa indonesia* as target language.

4.2 Suggestions

After finishing the research, I have some suggestion for the students who will take the research of proposition as in the following:

1. The student should find different data which has not ever been used in the previous research.
2. The student should find different method and theory in order to have better analysis.
3. The student should understand the theory that is used in their research.
