CHAPTER III

CONCLUSIONS AND SUGGESTIONS

3.1 Conclusions

Based on the data in the chapter II, there are two data which have been analyzed. The problem result which is occurred during process of translation 5cm movie script and the analysis result can be explained below:

Issue occurred during process translation 5cm movie script is in transferring meaning. It becomes a complicated process because in process of translation both Target language and Source Language have different culture. Solving problems regarding the issue translation process is complicated. The writer used three Indonesian categories which are non-formal, formal, and slang to solve the problems in the process of translation 5cm movie script. The writer also used KBBI to changed form from non-formal to formal and offering two changed form.

Therefore during the process of translation, translator should understand rules in Indonesian language as Source Language and grammatical structure in English as Target Language, so that the process of translation can be done.

3.2 Suggestions

This research more focused in the process translation. So, next researchers who are interested in translation can discuss about English slang which is British slang or American slang in a book or a movie script. The most important thing to do for next researcher is find the theory that will discuss. It will help you when do analyze.
