Abstract: *This study was aimed to describe the efforts made by the Japanese Department in improving the quality of graduates through tracer studies. The method used is descriptive analysis. Data collection was conducted through interviews with the head of Japanese Department of Universitas Komputer Indonesia and documentation studies. In the Research Findings it was explained that the average time needed by graduates to get the first job was 1.25 months, 70% of graduates worked in accordance with the fields they had studied, 60% of users stated that graduate performance was very good. In addition, users also expect that the English language skills of graduates are further enhanced. Therefore, Japanese Department should always make efforts to increase the hard skills and soft skills of graduates to be able to compete in the global market.*
